

# Trial Online EDC

The Electronic Data Capture System You Can Trust

### Simplify, Accelerate, and Strengthen Your Clinical Data Management

Replior's Electronic Data Capture (EDC) system is designed for modern clinical research teams who want both ease of use and advanced control. With an intuitive interface and robust, secure architecture, our EDC platform enables confident data collection, faster study setup, and reliable compliance—no programming skills required.

### Key Benefits

#### Easy, Code-Free Setup Design and launch studies without programming. Our intuitive frontend builder empowers your team to configure studies quickly and accurately.

#### Advanced Edit Checks

Create both simple and highly advanced edit checks to ensure data quality and compliance from day one.

#### Global Standards Library

Accelerate design with a built-in library including CDASH-compliant forms and SDTM code lists for regulatory-ready data structures.

#### Flexible, Insightful Reporting

Gain actionable insights with a powerful reporting engine offering numerous ready-to-use standard reports and the flexibility to build custom outputs.

#### Secure, Compliant, and Scalable

Built with GCP and 21 CFR Part 11 compliance in mind, our EDC ensures data integrity, security, and auditability for trials of any size.

### Designed for Your Needs:

- 🦰 Simple, no-code setup
- Advanced edit checks
- CDASH and SDTM-ready
- Secure, compliant, scalable
- Powerful reporting and analysis

### Features at a Glance

- User-friendly study builder for rapid setup
- Configurable edit checks, from basic to complex logic
- CDASH forms and SDTM code lists ready to use
- Built-in randomization module
- Real-time validation with automated edit checks
- Responsive design for desktops, tablets, and mobile devices
- Comprehensive audit trail for regulatory compliance
- Role-based user management and permissions
- Flexible reporting engine with export options
- Integration-friendly for lab data, ePRO, and other systems

### Technical data

## Why Choose Replior EDC?

Replior's EDC is designed to reduce complexity without sacrificing power. From small, single-site studies to large, multi-center trials, it gives your team the tools to collect, manage, and report data efficiently and securely—so you can focus on what matters most: advancing healthcare through reliable research.
